U.S. Citizen

Education

Georgia Institute of Technology Atlanta, GA
Bachelor of Science in Computational Media, Minor in Industrial Design | GPA: 3.62/4.00 *Expected May 2028*

- **Thread:** Media & Games | **Coursework:** Linear Algebra, Data Structures & Algorithms, Object-Oriented Programming, Systems Programming in C, Artificial Intelligence

Technical Skills

Rigging & Animation: Blender (Rigging, Character/Camera Animation, Shader Nodes, Texture Paint, Compositor)
3D Modeling: Blender (Low-Poly Character & Environment Modeling, Topology), Nomad Sculpt, MagicaVoxel
Scripting & Languages: Python, C#, C, Java, JavaScript, HTML/CSS
Engine & Tech Art: Unity 6 (URP, Shader Graph, Toon Shader, Particle VFX, C# Scripting), Git, GitHub, Figma

Experience

Project Co-Lead – 3D, Animation, VFX & UI Summer 2026 – Present
Unraveling – Georgia Tech Video Game Development Club (Unity 6, Blender) *Atlanta, GA*

- Rigged and animated two enemy creatures (Diver, Weaver) in Blender with a fellow co-lead, stepping in when the team was short on animators, and built the Unity particle-trail VFX attached to both
- Modeled the full Level 1 cast (protagonist, teacher, classmates) and two environments as low-poly meshes from 2D turnarounds, handing characters off to teammates for rigging and animation
- Leading the 10+ artist 3D, animation, VFX, and UI subteams of a 40+ person team; authored the onboarding style guide and Blender-to-Unity pipeline every artist follows, with sublead review before merges
- At the Milestone 2 playtest, 8 of 12 testers praised the art, models, or effects unprompted (7.7/10 fun); now iterating attack wind-ups and trails so creature attacks read before they land

Undergraduate Student Researcher Aug. 2026 – Present
TokenVerse – GT Expressive Machinery Lab *Atlanta, GA*

- Building environments and 3D assets in Blender, integrating them into Unity, and designing level layouts for TokenVerse, a research game teaching AI literacy (shown at Games for Change 2026)

Code and 3D Modeling Instructor June 2026 – Aug. 2026
iCode San Ramon *San Ramon, CA*

- Instructed 3D modeling and low-poly topology (CAD, Blender) and led Python drone-programming projects (real-time face tracking, photo capture, camera filters) for weekly classes of 8-10 K-12 students

Product and Design Senior Ambassador July 2026 – Present
Meitu Inc. *Atlanta, GA*

- Analyzing product interactions across global creative apps (10M+ users) and prototyping feature proposals in Figma, averaging a 1.3x bonus multiplier per report, with one feature adopted into production

Projects

Furina Character Study (Genshin Impact fan art) | *Blender* 2026

- Modeled a stylized character and layered clothing solo from a front/side/back turnaround, checking proportions against every view; built a custom two-tone toon material in Blender's Shader Editor
- Hand-painted eyes, blush, and fabric folds so clothing reads under flat shading, verified in a 120-frame turntable

City Fall | *Blender* 2026 – Present

- Animating a character falling through a stylized city solo, including city modeling, camera animation, and a compositor pass for glow, glitch, and lens distortion

Adversarial AI Bot | *Python, NumPy, Git* Apr. 2026

- Co-developed a Python agent placing top 20 in Georgia Tech's CS 3600 AI tournament, using a custom Hidden Markov Model to track a hidden opponent from noisy sensor data; debugged over 100s of test matches
