U.S. Citizen

Education

Georgia Institute of Technology Atlanta, GA
Bachelor of Science in Computational Media, Minor in Industrial Design | GPA: 3.62/4.00 *Expected May 2028*

- **Thread:** Media & Games | **Coursework:** Linear Algebra, Data Structures & Algorithms, Systems Programming in C, Object-Oriented Programming, Discrete Mathematics

Technical Skills

Shaders & Rendering: Unity URP Shader Graph, Toon Shader, Particle VFX, Blender Shader Editor (NPR)
Post-Processing & Look Dev: Blender Compositor (Glow, Glitch, Lens Distortion), Texture Painting, Lighting
3D Content: Blender (Low-Poly Modeling, Topology, Rigging, Animation), Nomad Sculpt, MagicaVoxel
Languages & Math: C#, Python, C, Java, JavaScript, HTML/CSS; Linear Algebra (3D Math)
Engine & Pipeline: Unity 6 (URP, C# Scripting), Git, GitHub, Visual Studio, Figma, Adobe Creative Cloud

Experience

Project Co-Lead – 3D, Animation, VFX & UI Summer 2026 – Present
Unraveling – Georgia Tech Video Game Development Club (Unity 6, Blender) *Atlanta, GA*

- Built a particle-trail VFX in Unity's node editor, tuning it in an isolated test scene before attaching it to two enemy creatures; now iterating trails to show attack direction after 5 of 12 playtesters couldn't read it
- Rebuilt every Blender material on Unity's Toon Shader (shadow color, colored outline, rim light) for one consistent toon look, and capped subdivision at 1–2 levels to protect real-time performance
- Authored the onboarding art style guide and Blender-to-Unity pipeline documentation for 10+ artists across 3D, animation, VFX, and UI subteams of a 40+ person team, with sublead review before merges
- Modeled the full Level 1 cast and two environments and rigged two creatures; at the Milestone 2 playtest, 8 of 12 testers praised the art or effects unprompted; now debugging an outline artifact near the camera

Undergraduate Student Researcher Aug. 2026 – Present
TokenVerse – GT Expressive Machinery Lab *Atlanta, GA*

- Building environments and 3D assets in Blender, integrating them into Unity, and designing level layouts for TokenVerse, a research game teaching AI literacy (shown at Games for Change 2026)

Product and Design Senior Ambassador July 2026 – Present
Meitu Inc. *Atlanta, GA*

- Analyzing product interactions across global creative apps (10M+ users) and prototyping feature proposals in Figma, averaging a 1.3x bonus multiplier per report, with one feature adopted into production

Code and 3D Modeling Instructor June 2026 – Aug. 2026
iCode San Ramon *San Ramon, CA*

- Instructed 3D modeling and low-poly topology (CAD, Blender) and led Python drone-programming projects (real-time face tracking, camera filters) for weekly classes of 8-10 K-12 students

Projects

Furina Toon Shader Study (Genshin Impact fan art) | *Blender Shader Editor* 2026

- Built a custom NPR material in Blender's Shader Editor that quantizes lighting into two flat tones with a hard terminator, so a 3D character reads like a 2D illustration from any angle
- Modeled the character solo from a turnaround and hand-painted eyes, blush, and fabric folds; validated shading in a 120-frame turntable and documented next fixes (outline pass, face-shadow control)

City Fall | *Blender, Compositor* 2026 – Present

- Building a post-processing stack in Blender's compositor (glow, glitch, lens distortion) over a solo-animated fall through a stylized city, including city modeling and camera animation
