Lydia He

408-614-9443 | lhe309@gatech.edu | linkedin.com/in/lydiahhe | Portfolio: lydiahe.com | github.com/lydia2s
U.S. Citizen

Education

Georgia Institute of Technology Atlanta, GA
Bachelor of Science in Computational Media, Minor in Industrial Design | GPA: 3.62/4.00 *Expected May 2028*

- **Thread:** Media & Games | **Coursework:** Objects & Design, Object-Oriented Programming, Data Structures & Algorithms, Systems Programming in C, Discrete Mathematics

Technical Skills

Languages: JavaScript, HTML/CSS, Java, Python, C#, C
Frontend & Web: DOM APIs, React (familiar), Three.js, Web Audio API, Vite, JSON, REST APIs, Firebase
UX & Accessibility: Figma (User Flows, Wireframes, Prototypes), ARIA, Keyboard Navigation, Data Visualization
Tools & Practices: Git, GitHub (Pull Requests, Code Review), Android Studio, MVVM, SOLID, Agile Sprints

Projects

Portfolio Website (lydiahe.com) | *JavaScript, HTML/CSS, Three.js, Vite, Git* June 2026 – Present

- Built and deployed a data-driven portfolio in vanilla JavaScript: 11 case studies render from one project data model into a gallery and modal viewer, with hash-based deep links and lazy-loaded media
- Made it accessible: an ARIA modal dialog with keyboard navigation (Escape, arrow keys), labeled toggle states, focus-visible styles, and prefers-reduced-motion fallbacks for all animation
- Built an interactive Three.js aquarium with Web Audio API music, shipped in 39 commits to a custom domain

Spendwise | *Java, Android Studio, Firebase, MVVM, Git* Sep. 2025 – Nov. 2025

- Built budget calculation with factory and strategy patterns, the reminder system for exceeded budgets and unlogged expenses, and the 5-tab navigation for a 5-person team's MVVM Android app (CS 2340)
- Integrated Firebase budget tracking and deployed the project site to GitHub Pages, across 4 Agile sprints planned on GitHub Projects

SpeechWrite (Hacklytics 2026) | *JavaScript, HTML/CSS, Python, OpenAI Whisper, Figma* Feb. 2026

- Designed in Figma and built the frontend for a tool exposing accent bias in speech recognition: a globe heatmap of error rates, click-through country details, per-accent phoneme charts, and an upload flow
- Collected Mozilla Common Voice audio and transcripts grouped by accent for an analysis that found 2–5x higher error rates for speakers from non-Western backgrounds

CareBear (Hack Like W@CC 2026) | *Figma; team stack: React, TypeScript, Gemini API* 2026

- Designed user flows and annotated wireframes (setup, tap-to-log, shift handoff) that two backend engineers built into a React/TypeScript mobile web app for caregivers of medically complex children

Experience

Product and Design Senior Ambassador July 2026 – Present
Meitu Inc. *Atlanta, GA*

- Analyzing user flows and product interactions across global creative apps (10M+ users) and prototyping feature proposals in Figma, averaging a 1.3x bonus multiplier per report, with one feature adopted into production

Project Co-Lead – 3D, Animation, VFX & UI Summer 2026 – Present
Unraveling – Georgia Tech Video Game Development Club *Atlanta, GA*

- Co-leading a 40+ person game team and running 10+ artists across four subteams, including UI; pull requests merge only after sublead review, and 10 of 12 playtesters found the UI clear

Undergraduate Student Researcher Aug. 2026 – Present
TokenVerse – GT Expressive Machinery Lab *Atlanta, GA*

- Building environments, 3D assets, and level layouts in Blender and Unity for a research game teaching AI literacy

Code and 3D Modeling Instructor June 2026 – Aug. 2026
iCode San Ramon *San Ramon, CA*

- Led Python drone-programming projects (real-time face tracking, photo capture) and taught 3D modeling for weekly classes of 8-10 K-12 students
