Lydia He

408-614-9443 | lhe309@gatech.edu | linkedin.com/in/lydiahhe | Portfolio: lydiahe.com | github.com/lydia2s

Availability: Summer 2027, May – Aug. 2027 (full-time, 12 weeks) | U.S. Citizen

Education

Georgia Institute of Technology Atlanta, GA

Bachelor of Science in Computational Media, Minor in Industrial Design | GPA: 3.62/4.00 *Expected May 2028*

- **Thread:** Media & Games | **Coursework:** Artificial Intelligence, Objects & Design, Data Structures & Algorithms

Skills

Product & Interaction Design: Figma (Components, Prototyping), User Flows, Wireframes, iOS/Android UI
AI Tools: Claude, Cursor, ChatGPT, Figma AI
Research & Data: Surveys, Playtesting & Usability Feedback, Data Visualization
Visual & Motion: Style Guides, Adobe Photoshop, Illustrator, Procreate, Motion Graphics, Blender
Prototyping in Code: HTML/CSS/JavaScript, Three.js, Python, Java, C#

Experience

Product and Design Senior Ambassador July 2026 – Present

Meitu Inc. *Atlanta, GA*

- Analyzing product interactions and UX across Meitu's consumer photo and video editing apps (10M+ users)
- Turning findings into feature proposals prototyped in Figma, averaging a 1.3x bonus multiplier per report; one feature idea adopted into production

Project Co-Lead – 3D, Animation, VFX & UI Summer 2026 – Present

Unraveling – Georgia Tech Video Game Development Club *Atlanta, GA*

- Leading 10+ artists across UI, 3D, animation, and VFX subteams of a 40+ person team; wrote the onboarding style guide every artist designs from, with sublead review before work merges
- Ran structured playtest iteration: 10 of 12 players found the UI clear; when 5 of 12 couldn't read where attacks were heading, now redesigning feedback cues (wind-ups, direction trails, hit/dodge states)

Undergraduate Student Researcher Aug. 2026 – Present

TokenVerse – GT Expressive Machinery Lab *Atlanta, GA*

- Building environments and level layouts for a research game that teaches players how AI language models work

Projects

iTravl – AI Travel Companion (Rice Designathon 2025, 48 hrs) | *Figma* 2025

- Surveyed 20 travelers (14 named something translation apps get wrong: context, tone, culture) to scope an AI companion that translates with context and explains local norms
- Designed lo-fi flows and co-designed the hi-fi mobile prototype: Translation, Learning, and Capture modes, a one-tap mode swap, and an in-context AI chatbot (Travl Buddy)

CareBear – AI Caregiving Handoff (Hack Like W@CC 2026) | *Figma, Motion Graphics* 2026

- Mapped setup, onboarding, tap-to-log, and handoff flows and wireframed AI touchpoints (a shift summary on the home screen, suggested notes on each NFC tap) for exhausted, often one-handed caregivers
- Created the brand: a mascot with 8 mood states that react to task progress, printed NFC sticker labels, and the motion-graphic showreel

SpeechWrite – AI Speech Bias Visualizer (Hacklytics 2026) | *Figma, HTML/CSS/JS, OpenAI Whisper* 2026

- Designed and built the UI that makes speech-recognition bias legible: a globe heatmap of error rates, per-accent phoneme charts, and an upload-and-analyze flow; analysis found 2–5x higher error rates for non-Western accents

Data Dump (GMTK Game Jam 2026, 48 hrs) | *Figma, Unity* 2026

- Set UI direction and designed every screen in Figma, then rebuilt the shop around dragging parts onto the character with a live stats panel, so players understood the loop with zero onboarding

Portfolio Website (lydiahe.com) | *JavaScript, HTML/CSS, Three.js* 2026

- Designed and built a component-driven site: case studies render from one data model, with an accessible modal viewer, keyboard navigation, and reduced-motion support
